

## ACNE

- Acne is the **most common skin disorder** treated by physicians
- Usually begins in **puberty**, but is not restricted to any age group
- It is a **chronic skin condition that affects over 85% of adolescents and young adults**
- Caused by a hormone-induced increase in oil, bacteria and presents with redness, skin irritation, pimples, pustules and excess oil production

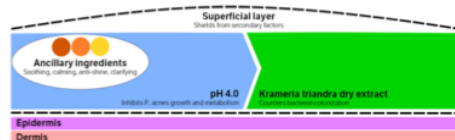

## DERMALEX REPAIR

*Provides effective relief for mild to moderate Acne*

It exerts two synergetic activities that focus on inhibiting bacterial growth and colonisation

Uses the unique MEC4 complex, to relieve symptoms, create a protective layer and help restore the skin's natural flora

-Apply twice a day

## CLINICALLY TESTED

- Reduces acne breakouts
  - Restores the skin's natural pH
  - Inhibits acne bacteria and purifies the skin
  - The tolerability was judged good to very good in 90% of the cases
- Non photo sensitising  
 86% reduction of Erythema (skin redness)  
 76% reduction of scaling  
 52% reduction of pustules (pimples, whiteheads)
